ansaction Data (269 720 rows) Column: customer_id (8,842 distinct values)

Goto Model View and delete the relationship which has been created automatically.

The screenshot shows the Power BI Desktop interface. The ribbon at the top includes 'File', 'Home', and 'Help'. The 'Model View' is active, showing a relationship diagram with two tables: 'Transaction Data' and 'Customer data for Hands-on Exercise'. A relationship line connects the 'customer_id' column in 'Transaction Data' to the 'customer_id' column in 'Customer data for Hands-on Exercise'. A 'Delete Relationship' dialog box is open in the center, asking 'Do you want to delete this table relationship(s)? Visuals using data from the related tables might be broken.' The dialog box has a 'Yes' button and a 'Cancel' button. The background shows the Power BI interface with the ribbon, navigation pane, and the relationship diagram.

Transaction Data

In Transaction Data, create measures:

Qty Sold (Sum of Quantity)?

Qty Sold = SUM('Transaction Data (2)')[quantity]

The screenshot shows a Power BI Desktop interface. On the left, a measure named 'Qty Sold' is defined as `SUM('Transaction Data (2)')[quantity]`. In the center, a diagram shows a relationship between 'Transaction Data (2)' and 'Customer_Lookup' tables. 'Transaction Data (2)' has columns: customer_id, product_id, quantity, SourceName, stock_date, store_id, transaction_date, and Qty Sold. 'Customer_Lookup' has columns: acct_open_date, birthdate, Current Age, Customer Priority, customer_acct_num, customer_address, customer_city, customer_country, customer_id, customer_postal_code, customer_state_province, education, first_name, gender, and Collapse. On the right, the 'Properties' pane shows the measure's name, home table, description, synonyms, display folder, and hidden status. The 'Data' pane on the far right shows the data model with 'Transaction Data (2)' and 'Customer_Lookup' tables.

Total Orders (Count of Orders)

Total Orders = DISTINCTCOUNT('Transaction Data'[customer_id])

The screenshot shows a Power BI Desktop interface. On the left, a measure named 'Total Orders' is defined as `DISTINCTCOUNT('Transaction Data'[customer_id])`. In the center, a diagram shows a relationship between 'Customer data for Han...' and 'Transaction Data' tables. 'Customer data for Han...' has columns: acct_open_date, birthdate, Current Age, Customer Priority, customer_acct_num, customer_address, customer_city, customer_country, and customer_id. 'Transaction Data' has columns: customer_id, product_id, quantity, SourceName, stock_date, store_id, and transaction_date. On the right, the 'Properties' pane shows the measure's name, home table, description, synonyms, display folder, hidden status, and formatting options. The 'Data' pane on the far right shows the data model with 'Customer data for Han...' and 'Transaction Data' tables.

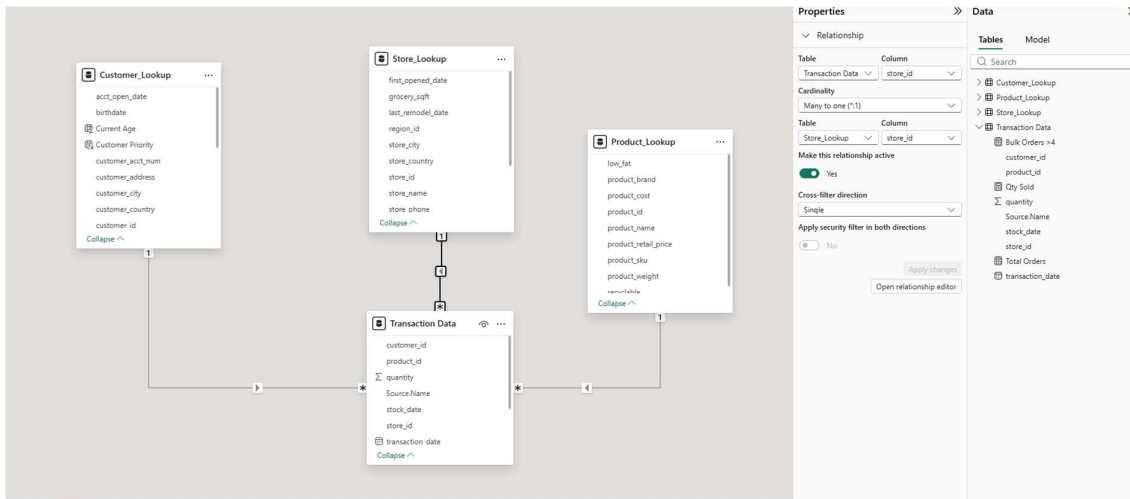

Bulk Orders (Orders with Quantity > 4)

Bulk Orders > 4 = CALCULATE(DISTINCTCOUNT('Transaction Data'[customer_id]), 'Transaction Data'[quantity] > 4)

The screenshot shows a Power BI Desktop interface. On the left, a measure named 'Bulk Orders > 4' is defined as `CALCULATE(DISTINCTCOUNT('Transaction Data'[customer_id]), 'Transaction Data'[quantity] > 4)`. In the center, a diagram shows a relationship between 'Customer data for Han...' and 'Transaction Data' tables. 'Customer data for Han...' has columns: acct_open_date, birthdate, Current Age, Customer Priority, customer_acct_num, customer_address, customer_city, customer_country, and customer_id. 'Transaction Data' has columns: customer_id, product_id, quantity, SourceName, stock_date, store_id, and transaction_date. On the right, the 'Properties' pane shows the measure's name, home table, description, synonyms, display folder, hidden status, and formatting options. The 'Data' pane on the far right shows the data model with 'Customer data for Han...' and 'Transaction Data' tables.

Report & Visualization Tasks

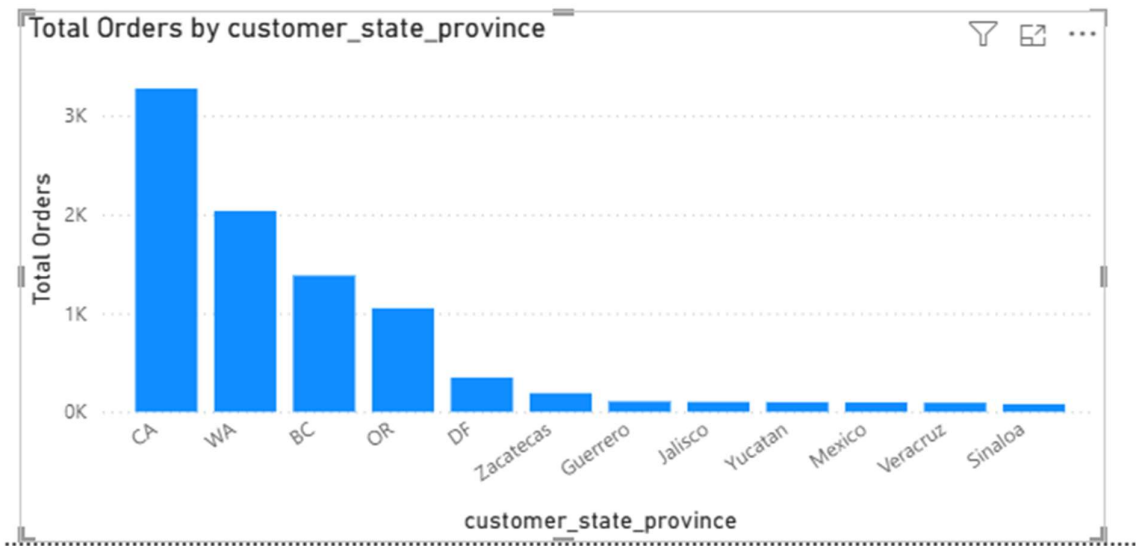

Create a Report View page named Summary and design visuals using Customer_Lookup

and Transaction Data tables. Add the following visuals and format them to match the provided reference design:

A Pie Chart showing Total Orders by Country

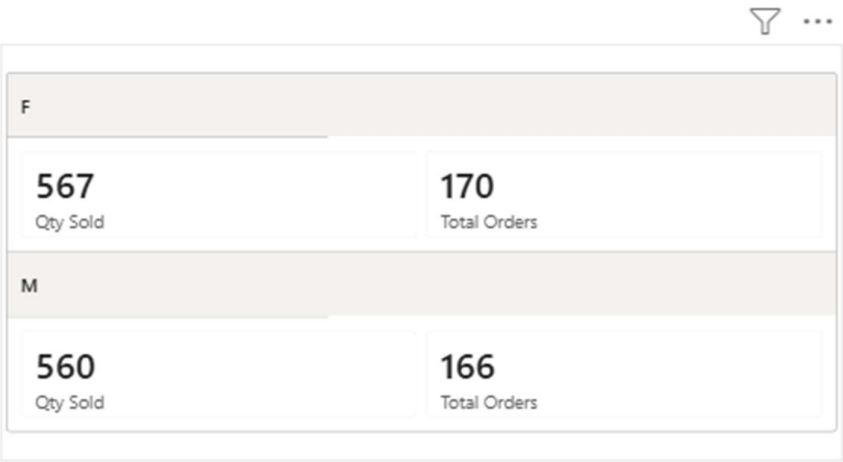

A Bar Chart showing Total Orders by State

A Matrix displaying Product Names, Qty Sold, and Total Orders

product_brand	Qty Sold	Total Orders
ADJ	620	193
Akron	1110	341
American	7423	1791
Amigo	1012	307
Applause	1114	336
Atomic	4132	1117
BBB Best	16395	3130
Best	2170	644
Best Choice	18553	3439
Better	12451	2638
